

urban blue

"From the beginning everything we have created has revolved around the rider. When we first started producing boards we combined the basics to the requirements of today. Pure, unpretentious products where the subtle emerges victorious over the spectacular"

KRYPTONICS.

FreeStyle SkimBoards

The new Urban Blue SkimBoard range takes SkimBoard development to a complete new level with all boards featuring full graphics and concave profile. This new freestyle range features 37.25" (946mm) x 20.75" (527mm) boards which are vacuum impregnated and laminated using American Pro Grip Water Resistant Glue for increased life of the board. The boards are then fully treated with 3 layers of water repellent varnish to further protect the board during use. These FreeStyle boards have a maximum rider capacity of 200 lbs. Urban Blue believe there are no finer Skimboards on the market today.
